SUBJECT: MIGRATORY BIRD CLEARANCE FOR T-2 TRENCH EXCAVATION WORK FOR
IHSS CLEANUP - MBM - 074 - 95

On August 23, 1995, Ecology personnel performed an additional migratory bird survey of the proposed T-2 Trench excavation work area. No bird nests were located, and no further ecological concerns were identified. The wetlands of concern adjacent to the work area have been more clearly delineated with pink survey flagging (see memo MBM - 049 - 95). If work at the site does not commence by September 6, 1995, an additional migratory bird survey will be required.
